March 2006

RoHS Compliance

Q-Tech Corporation warrants, that all products as built do not contain the Hazardous Substances as described by Directive 2002/95/EC of the European Parliament and of the council of 27 January 2003 on the restrictions of the use of the certain hazardous substances in electrical and electronic equipment (RoHS) and Directive 2003/11/EC of the European Parliament and of the council of 6 February 2003 amending for the 24th time Council Directive 76/769/EEC relating to restrictions on the marketing and use of certain dangerous substances and preparations as indicated:

Lead
Mercury
Cadmium
Hexavalent Chromium
Polybrominated biphenyls (PBB) or
Polybrominated diphenyl ethers (PBDE)
(Pentabromodiphenyl ether, Octabromodiphenyl ether)

All devices Q-Tech builds are "high-rel" by design and construction and are intrinsically compliant to the RoHS requirements without the need for alternate dedicated processes or part numbers.

Our standard device pin configurations use plated gold over nickel plated leads. Upon customer request, leads are available as solder-dipped (using a lead/tin coating, SN60 unless otherwise specified, as required by either their specification or various other military/commercial specifications).

Craig Albright

Director of Quality Assurance
Q-Tech Corporation
